

**|| Caristix solutions for HL7 testing save time
and reduce risk of missing errors at Ivenix inc ||**

Julia Salafia
is a Principal Software Test Engineer
at Ivenix, Inc in Boston.

When Julia's team identified a need for a simpler solution to perform HL7 testing, Julia was tasked with finding the right software vendor to automate these tasks. There had to be a better way to test HL7 messages across multiple medical devices and systems! Searching HL7 blogs and reviewing documentation online, Julia came across Caristix.

After Julia and her colleagues rigorously tested Caristix solutions, they concluded it would be the ideal solution for their needs. The Caristix Test application would **automate** their existing manual **testing activity**, **saving** Ivenix valuable **time** all the while **reducing** the risk of missing **errors**. Today, Julia is confident she and her team will keep pace with their anticipated testing requirements as the Ivenix install base grows.

ABOUT IVENIX INC

Ivenix is a medical technology company with the vision to eliminate infusion-related patient harm. Located just 30 miles north of Boston, the Ivenix Infusion System is an innovative infusion system and smart pump designed to enhance patient safety and fundamentally transform infusion delivery.
